

# eXOReaction: Strategic IP & Skill-Driven Development

Building production-grade intelligence at 25x velocity.

# The Innovation Engine: A Dual-Identity Powerhouse

We operate as a Product Engine that generates high-value IP at unprecedented speeds while validating our methodology through client success.

## Product Company

- **Assets:** Quadim (Production SaaS), Xorcery AAA (Strategic IP), lib-pcb (Manufacturing Tech)
- **Status:** Revenue-generating and market-ready

## Methodology Leader

- **Core:** Skill-Driven Development (SDD)
- **Metric:** 25-66x faster than industry standards (measured)

## Portfolio Breadth

- **Sectors:** DevSecOps, Manufacturing (PCB), Enterprise Knowledge, Real Estate/PropTech

North Star Metric: From idea to production-grade execution in days, not months.

# Skill-Driven Development (SDD): Human Skills, Amplified

A systematic framework where human expertise directs AI agents to achieve high-velocity precision.

- **Systematic, Not Ad-Hoc:**  
Framework-driven architecture.
- **Skill-Centric:**  
Requires high-level human architectural skill to direct the AI.
- **Conservative Claims:**  
We claim 10-30x productivity (proven).
- **Key Distinction:** It's not automation replacing the pilot; it's a jet engine attached to the pilot.

\* Coined by Vidar Moe (SpareBank 1), Feb 2026.

# Methodology in Action: The 'lib-pcb' Benchmark

## The Complexity

REPORT 88974066604CTZSC4

## The Metrics

Industry Standard: 10–18 Months

eXOReaction (SDD): 11 Days (Jan 16–27, 2026)

197,831

### Lines of Code (Java)

7,461

## Tests

99.8%

## Pass Rate

# 25-66x

## Speed Multiplier

Complex manufacturing logic, validated Gerber exports, and zero sacrifice on quality.

# Synthesis: Moving from Digital Chaos to Knowledge Assets

- **Problem:** Decades of unsearchable digital history.
- **Solution:** AI-Assisted Knowledge Infrastructure built in 40 hours.
- **Efficiency:** 5-10x faster than manual organization.
- **ROI:** System pays for itself in 2-3 weeks.
- **Value:** 400-600 hours saved per user annually.

# Xorcery AAA: The Complete Intelligence Stack

Alchemy + Aurora. Moving from "What happened?" to "Why it happened?"

Market Opportunity: Targeting the \$10B+ DevSecOps Intelligence market.

# Xorcery Alchemy: Real-Time Streaming Intelligence

- **Core Function:** Open-source framework for orchestrating data flow in DevSecOps.
- **Pipeline 1:** Risk Arbitrage (Correlates vulnerability alerts with asset context).
- **Pipeline 2:** Patch Orchestration (Automates detection-to-patch).
- **Pipeline 3:** Threat Detection (Ingests runtime signals with ML-heuristics).
- **Technical Edge:** Multi-Signal Correlation & Transparent Audit Trails.

# Aurora: Temporal Graph Analytics (The 'Why' Engine)

## A Time Machine for Your Data

**Superpower 1:**  
Perfect Past Recall.  
Compare any two  
moments in time.

**Superpower 2:** Complex  
Connection Mapping.  
See hidden dependencies.

**Superpower 3:**  
Unchangeable Audit Trail.  
Forensic-grade tracking.

**The AI Detective:**  
Ask plain English questions  
like "Why was the salary  
changed?" and get causal  
explanations.

# Client Success: Elprint (Manufacturing)

Active Velocity Platform (July 2025 – Present)

## STORY TEXT

- **Challenge:** Complex supply chain and manual BOM validation.
- **Solution:** Automated 'Velocity Platform' for PCB assembly with AI-powered component search.

**Speed:** 50% faster delivery (6 months vs. 12-18 industry avg).

**Performance:** 90% AI improvement (990ms to <100ms).

**Tech Stack:** Java 21, Vue.js 3, React 19 across 25 repositories.

# Client Success: Entra (Scale & Stability)

EntraOS Platform – 3.5 Years Active Development

Scope: 67 Repositories,  
40+ Microservices.

Volume: 200,000+  
Lines of Code.

Integration: Industrial protocols  
(BACnet) + Modern SaaS.

**Business Impact:** Connecting physical industrial protocols with modern tenant interfaces at enterprise scale. Proof that our code is maintainable and robust.

# Production Operations: Quadim & CatalystOne

We operate what we build.

**The Quadim Anchor:** Production SaaS serving multiple organizations. The stable foundation of our product identity.

**CatalystOne Integration:** Validated the Xorcery event-driven approach in a third-party enterprise environment.

# Business Model & Revenue Streams

## PRODUCTS

- Recurring & Licensing
  - SaaS: Quadim Subscription
  - Licensing: lib-pcb (Commercial EDA)
  - Platforms: Xorcery AAA (Enterprise)

## CONSULTING

- The “Skills Engine”
  - Strategic Retainers (Model: Mynder)
  - High-Velocity Custom Builds (SDD)

## TRAINING

- Education & Certification
  - SDD Workshops & Team Certification
  - Train-the-Trainer Enterprise Rollouts

# Market Opportunities & Reach

- DevSecOps  
Intelligence**
- Target: \$10B+ Global Market
  - Product: Xorcery AAA

- PCB &  
Manufacturing**
- Target: Specialized EDA Automation
  - Product: lib-pcb

# Strategic Vision: The Product Engine

## The Dual Purpose Strategy

- Every project builds IP *and* proves the Methodology.

## The Moat

- Proprietary Tech (Xorcery, Cantara) + Methodology (25-66x Velocity).

Transitioning from 'Consultancy with Products' to 'IP Powerhouse fueled by Consulting'.

# The Future of Development is Skill-Driven

**We have proven that high velocity does not require sacrificing quality.  
We have the metrics, the IP, and the clients to prove it.**

**PARTNER:**  
License Strategic IP  
(lib-pcb, Xorcery)

**LEARN:**  
Certify your  
teams in SDD

**TRANSFORM:**  
Engage the  
'Skills Engine'
