

Knowledge Infrastructure Health 2026

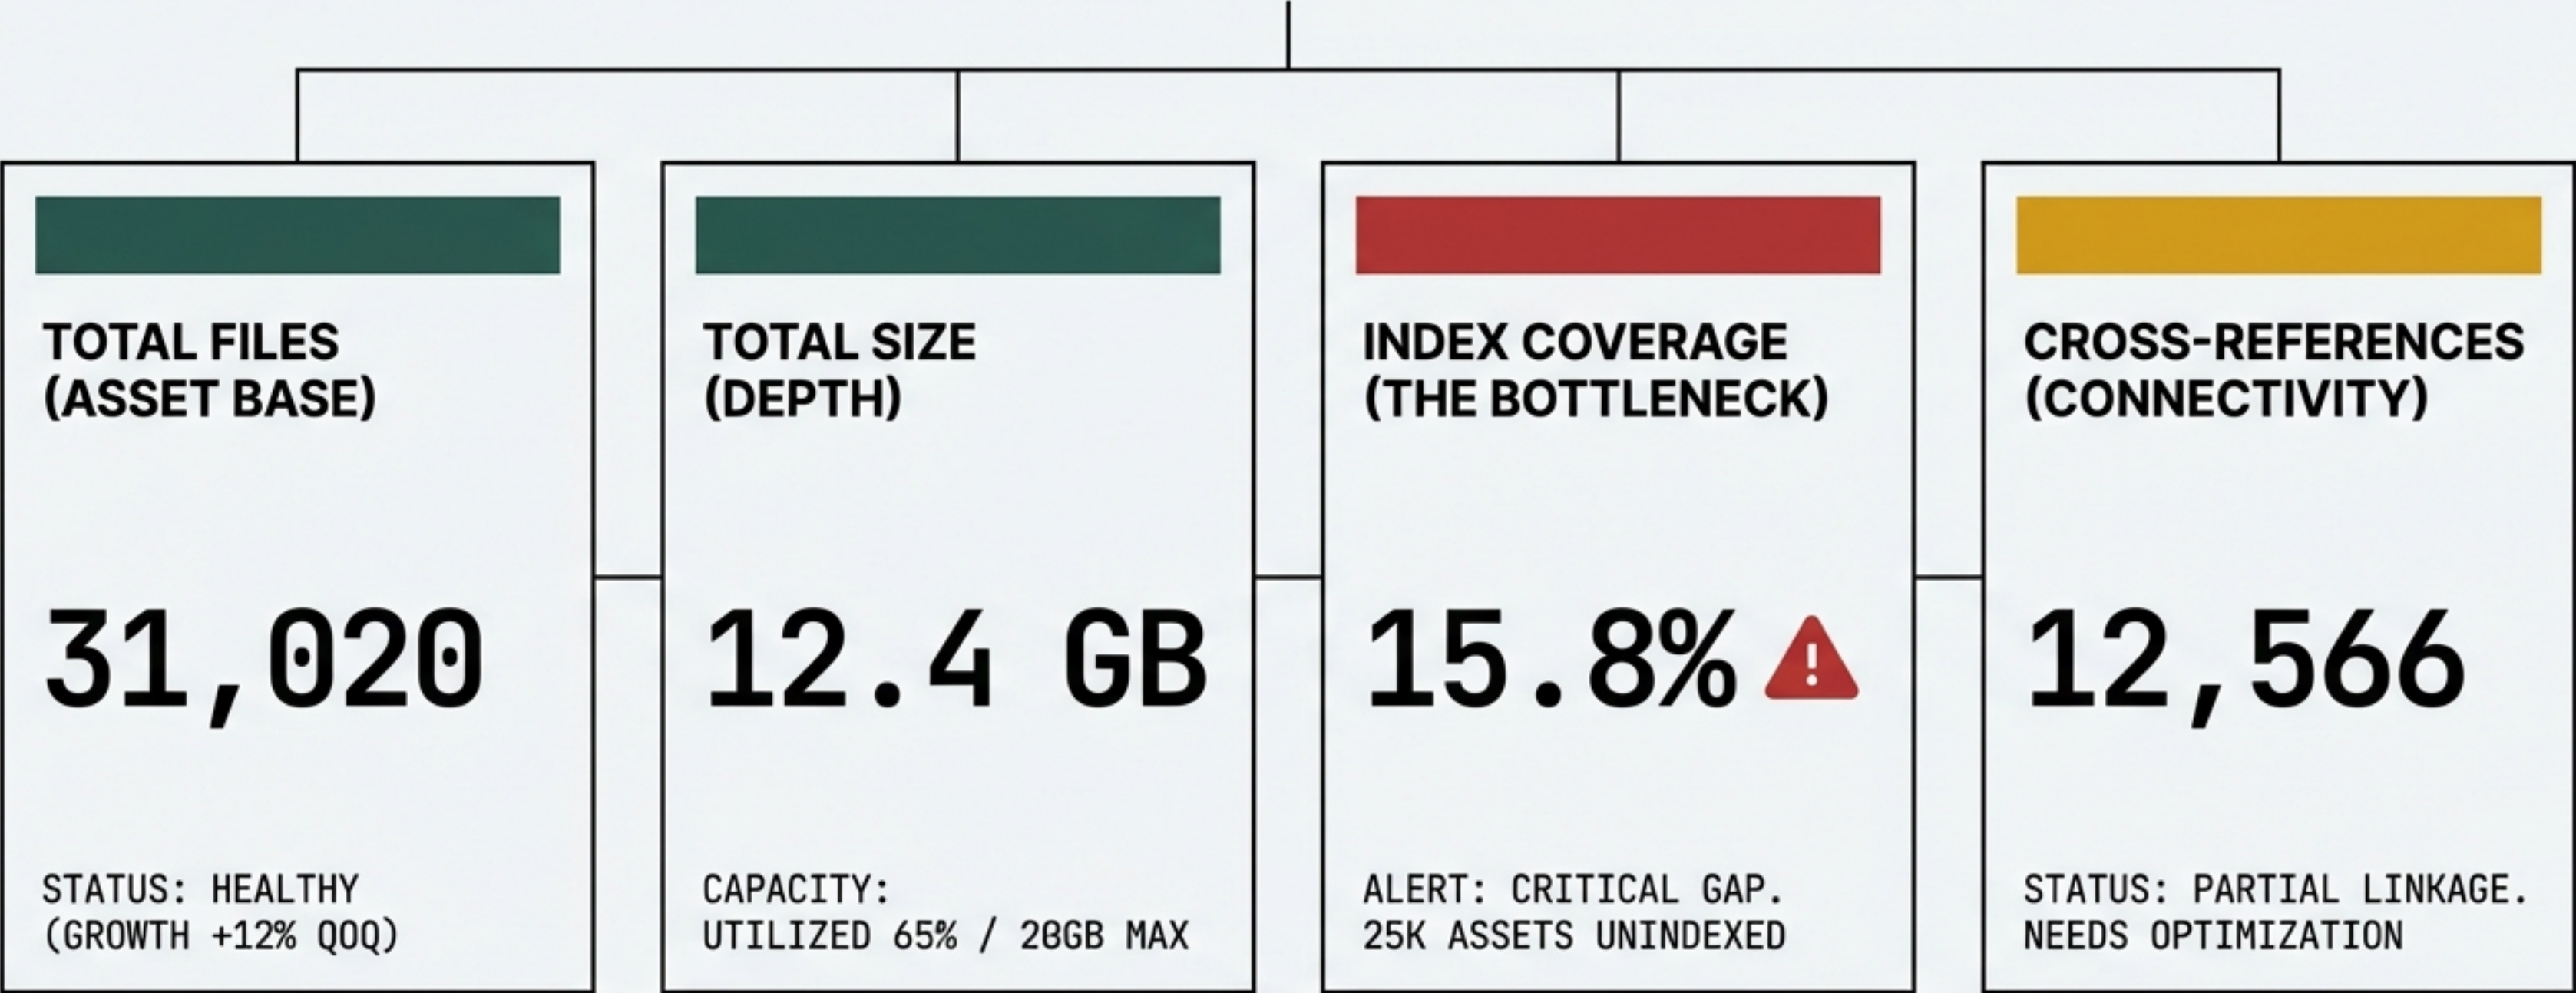

Turning Information into Asset:
A Roadmap to 80% Semantic Coverage

JetBrains Mono
Status: February 12, 2026
Update Frequency: Weekly
Source: `/tmp/generate_kg_stats.sh`

THE KNOWLEDGE ENGINE IS LARGE, ACTIVE, BUT "DARK"

Our system holds over 30,000 assets across three companies. While storage volume and activity are healthy, our ability to retrieve context is at a critical low.

OPTIMIZATION DIRECTLY SUPPORTS THE 1.4M NOK PIPELINE

We cannot close deals efficiently if we cannot find our own proofs.

PIPELINE VALUE	→	CRITICAL DEPENDENCIES
Total Pipeline: 965-1,405K NOK		Content Blockers:
Jon Petter: 190-230K (Status: Active)		Jon Petter → Requires: lib-pcb proof
Mynder: 540-900K/year		Mynder → Requires: Compliance velocity & AI security docs
SpareBank 1: 100-200K		SpareBank 1 → Requires: Security concepts & implementation guides
		Item Consulting → Requires: Workshop methodology

Source: PIPELINE-STATUS.md

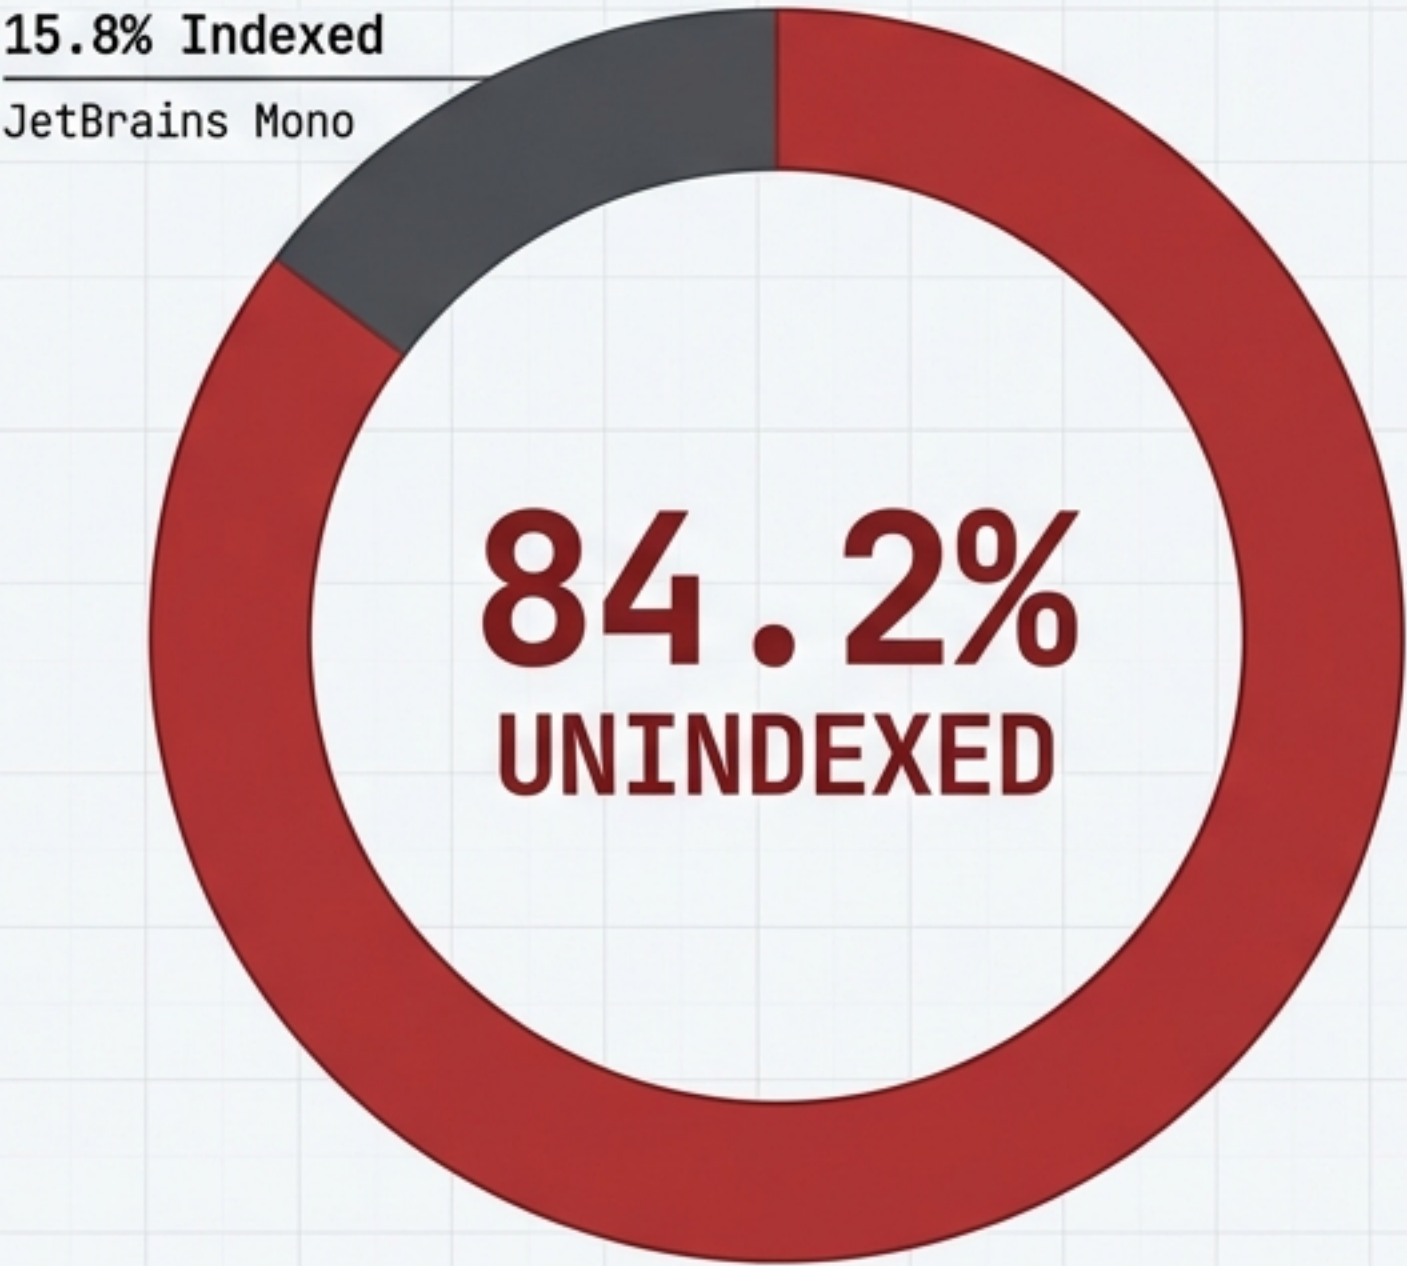

HEALTH INDICATORS: CAPACITY IS STRONG, ACCESSIBILITY IS WEAK

We are generating content faster than we are indexing it.

METRIC	eXOReaction	Quadim	Cantara
Volume / Size	7.8GB	4.0GB	622MB
Activity (7-Day)	567 Files	40 Files	16 Files
Cross-References	Strong	Moderate	Moderate
Index Coverage	16.0%	17.4%	4.6% Critical Gap: Frameworks at risk

THE 84% DISCOVERY GAP

To reach our target, we must address 3,304 specific directories that currently lack README files.

WHERE IS THE WORK?

Inter Tight

eXOReaction	3,117 DIRECTORIES
JetBrains Mono	JetBrains Mono
Cantara	102 DIRECTORIES
JetBrains Mono	JetBrains Mono
Quadim	85 DIRECTORIES
JetBrains Mono	JetBrains Mono

Inter Tight

PRIORITY: CANTARA HAS THE LOWEST COVERAGE (4.6%) BUT CONTAINS CRITICAL FRAMEWORKS.

ENTITY PROFILE: eXOReaction

High Velocity, Massive Scale

FILES: 29,579

SIZE: 7.8GB

COMPOSITION: .json (2,229)
.png (2,022)

Strategy: Requires manual sprints
due to high volume.

VELOCITY:

567 FILES MODIFIED → 81 files/day
(Last 7 Days) JetBrains Mono

NETWORK STRENGTH:

20.3 LINKS PER README
JetBrains Mono

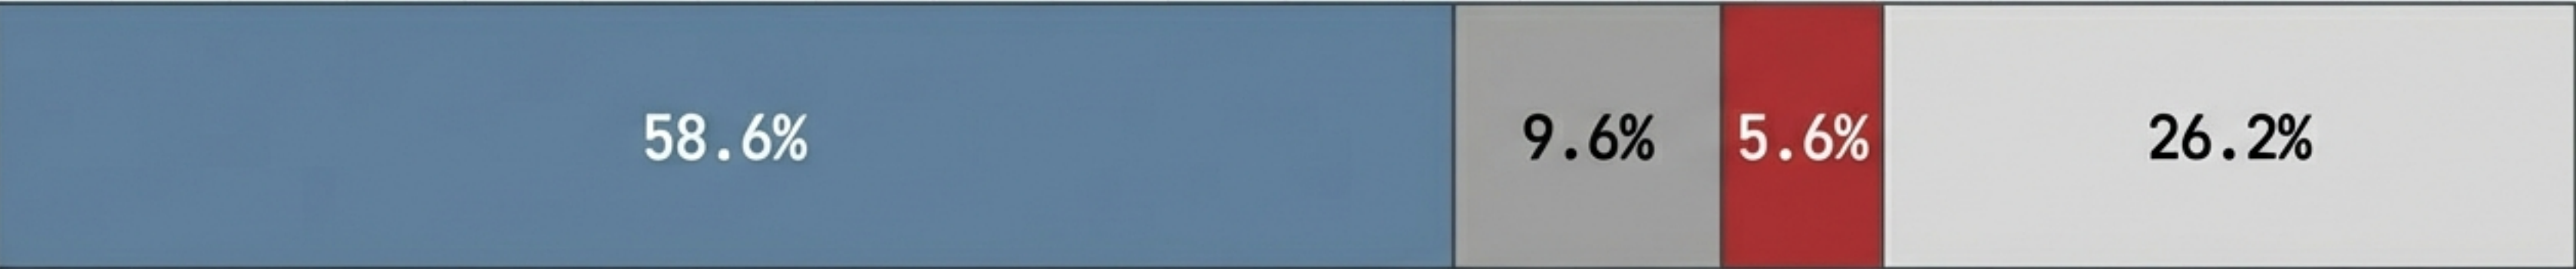

THE PROBLEM:

3,117 UNINDEXED DIRECTORIES
JetBrains Mono

ENTITY PROFILE: Quadim

The Media Repository

Heavy visual content requires vision-based categorization strategies.
Standard READMEs are too slow.

PNG Images (464 files)

JetBrains Mono

PDFs (76 files)

JetBrains Mono

Markdown (44 files)

JetBrains Mono
Low Context

Other

JetBrains Mono

Status: In Progress. Deploying vision-based screenshot categorization.

JetBrains Mono

Inter Tight ENTITY PROFILE: Cantara

High Quality, Low Visibility

40.2

JetBrains Mono

Links per README

Highest documentation efficiency.

4.6%

JetBrains Mono

Index Coverage

5 out of 107 directories covered.

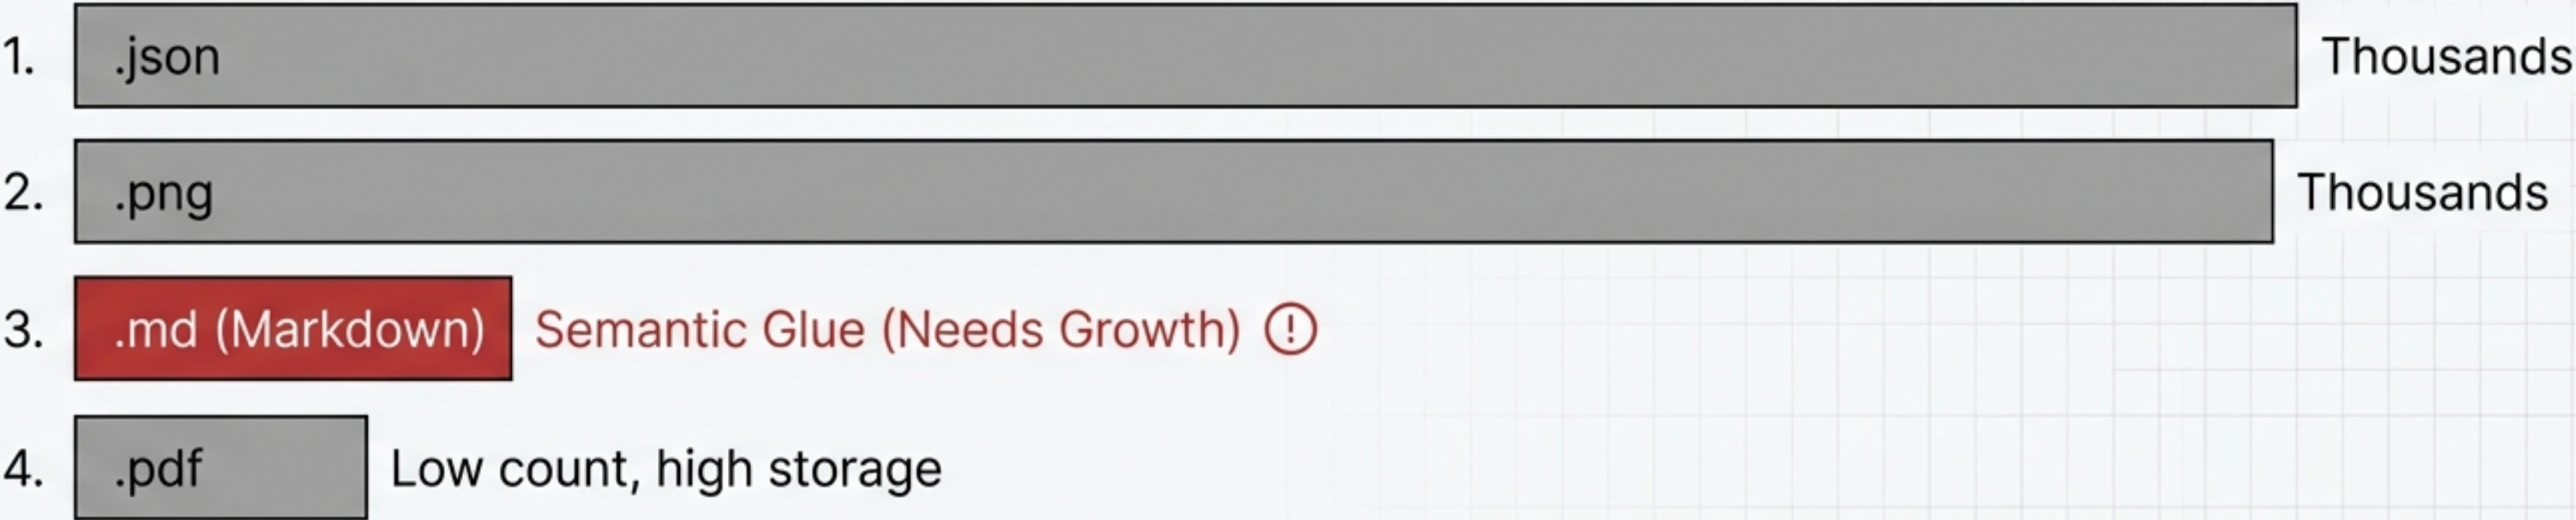

RISK ANALYSIS: Inter Tight Bold

- Risk: Critical gap for CatalystOne materials.
- Insight: Excellent quality, insufficient quantity.

Composition of the Knowledge Base

Markdown acts as the “semantic glue” for raw data, but it currently makes up a small fraction of the total file count.

FILE EXTENSION BREAKDOWN (SYSTEM-WIDE)

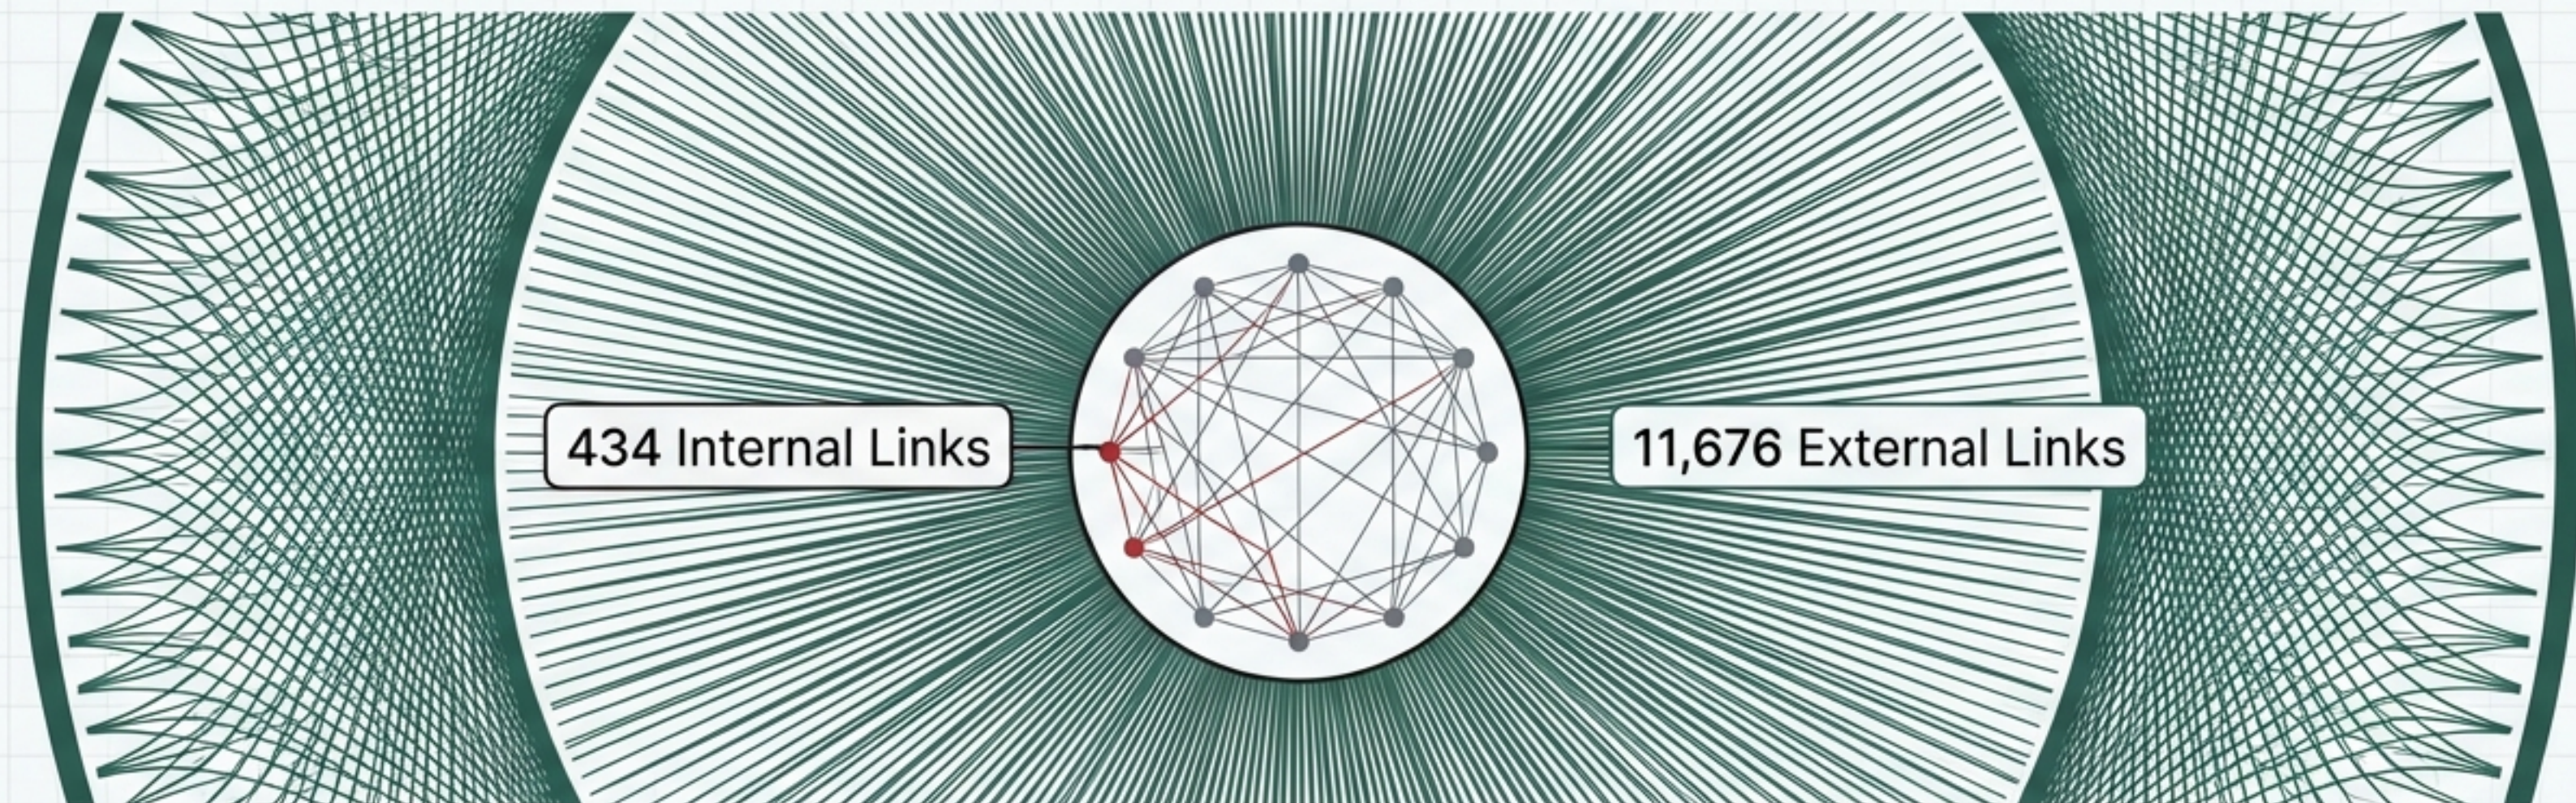

OBJECTIVE: Inter Tight Bold

Increase ratio of .md files to explain .json structures.

Cross-Reference Density & Network Effects

We are referencing the world effectively, but we are not linking our own concepts enough.

Current Avg: **20.3** links / README

Goal: **20,000+** Total Cross-References ↗

INSIGHT: Inter Tight Bold

Excellent external coverage, but a critical gap exists in internal cross-referencing, limiting knowledge graph connectivity.

Scaling via Automation

Managing 31,000 files requires tooling, not just manual effort.

COMPLETED

- Stats generation script (/tmp/generate_kg_stats.sh)
- Multi-company metrics aggregation
- Format breakdown analysis

IN PROGRESS

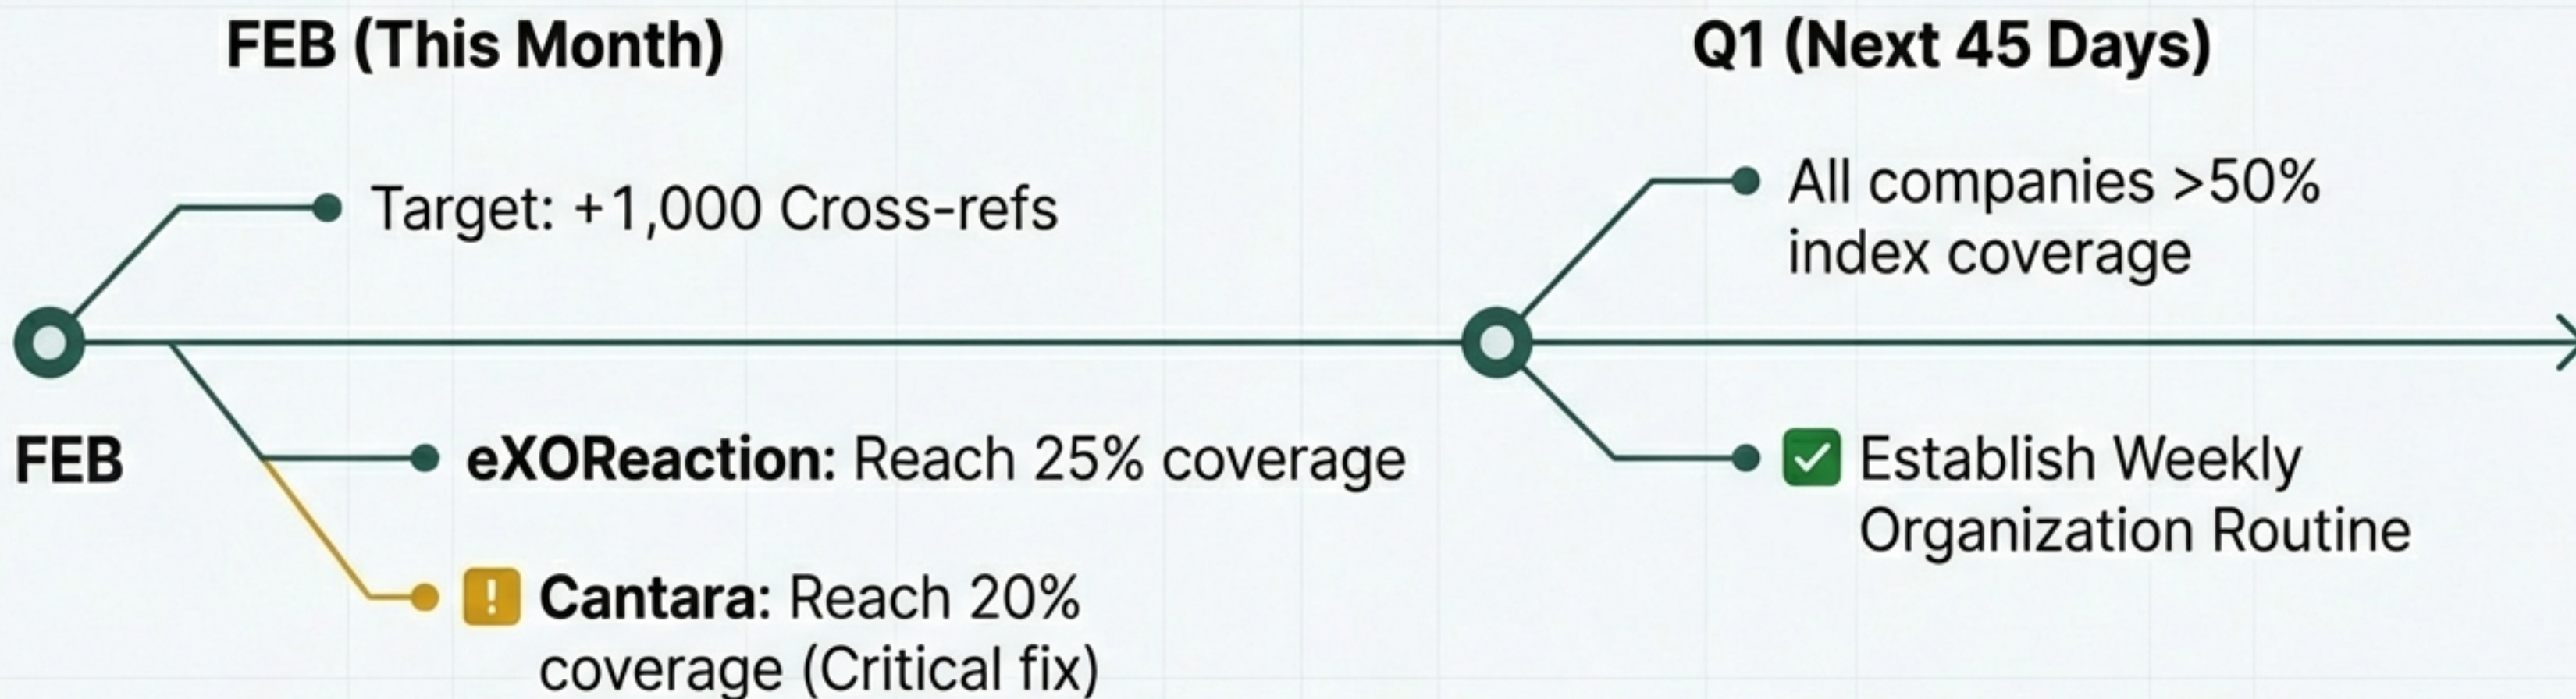

- Auto-update dashboard weekly
- Vision-based screenshot categorization

PLANNED

- Semantic PDF analysis
- Auto-suggest README content (AI)

Immediate Remediation Plan (Feb - Q1)

Sprint to lift coverage from 16% to 50%.

Routine: Stats Script Execution every Friday.

2026 Vision: A Self-Organizing System

Moving from manual catch-up to automated maintenance and value tracking.

>80% Coverage

3,139 READMEs

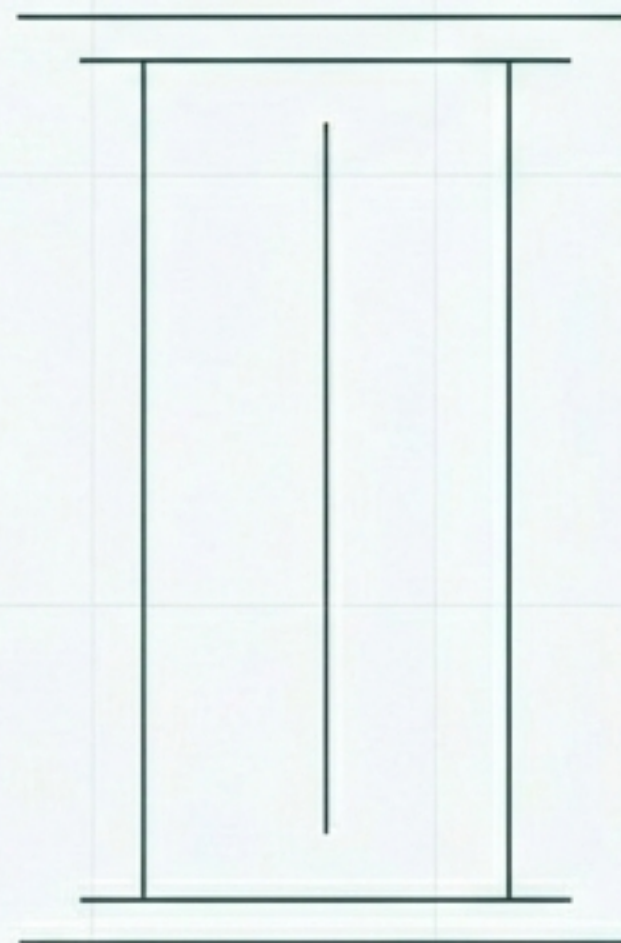

20,000+ Links

Cross-References

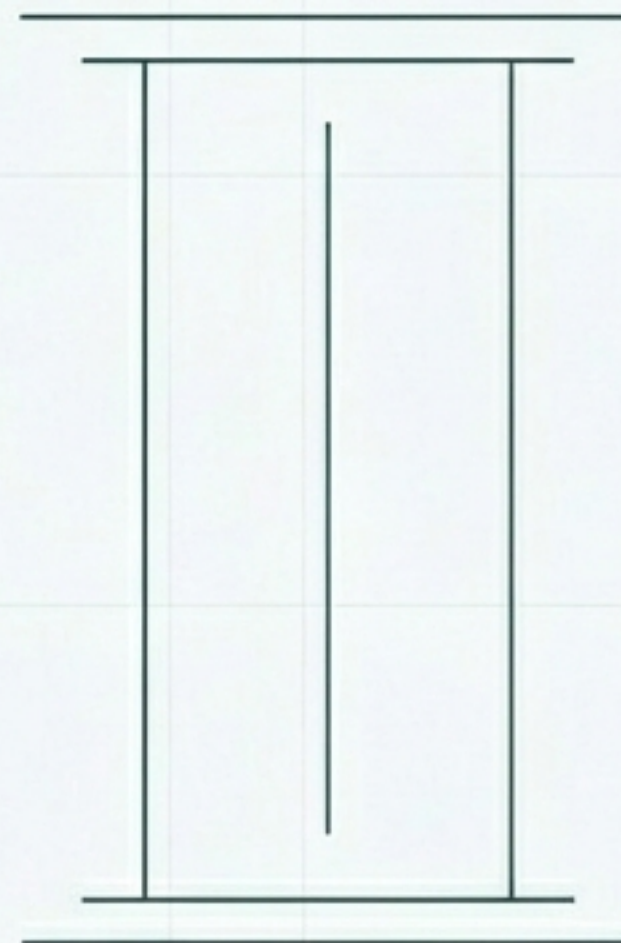

Automated

Zero-touch stats

ROI Tracked

Pipeline Value / Hours

Immediate Next Actions (This Week)

Focus on high-impact, manageable tasks to build momentum.

☒	eX0Reaction: Create 20 READMEs (Focus: business/, methodology/)
☒	Cantara: Create 5 READMEs (Focus: frameworks/, clients/)
☒	Documentation: Update cross-references in workflow docs
☒	Measurement: Run stats script Friday (2026-02-19)

“Starting small to build velocity.”

Knowledge Operations Manual
