Just indexing.

Search Across Silos Instantly

The Siloed Way

The Synthesis Way

The Client Demo: From Panic Mode to Calm Mode

Scenario: Client wants to see 'Real-Time Analytics' in 2 hours.

Before Synthesis

- ✗ Scouring Drive folders (200+ results)
- ✗ Slack threads dead-end
- ✗ Found wrong version of demo
- ✗ Result: Cobbled together from memory

With Synthesis

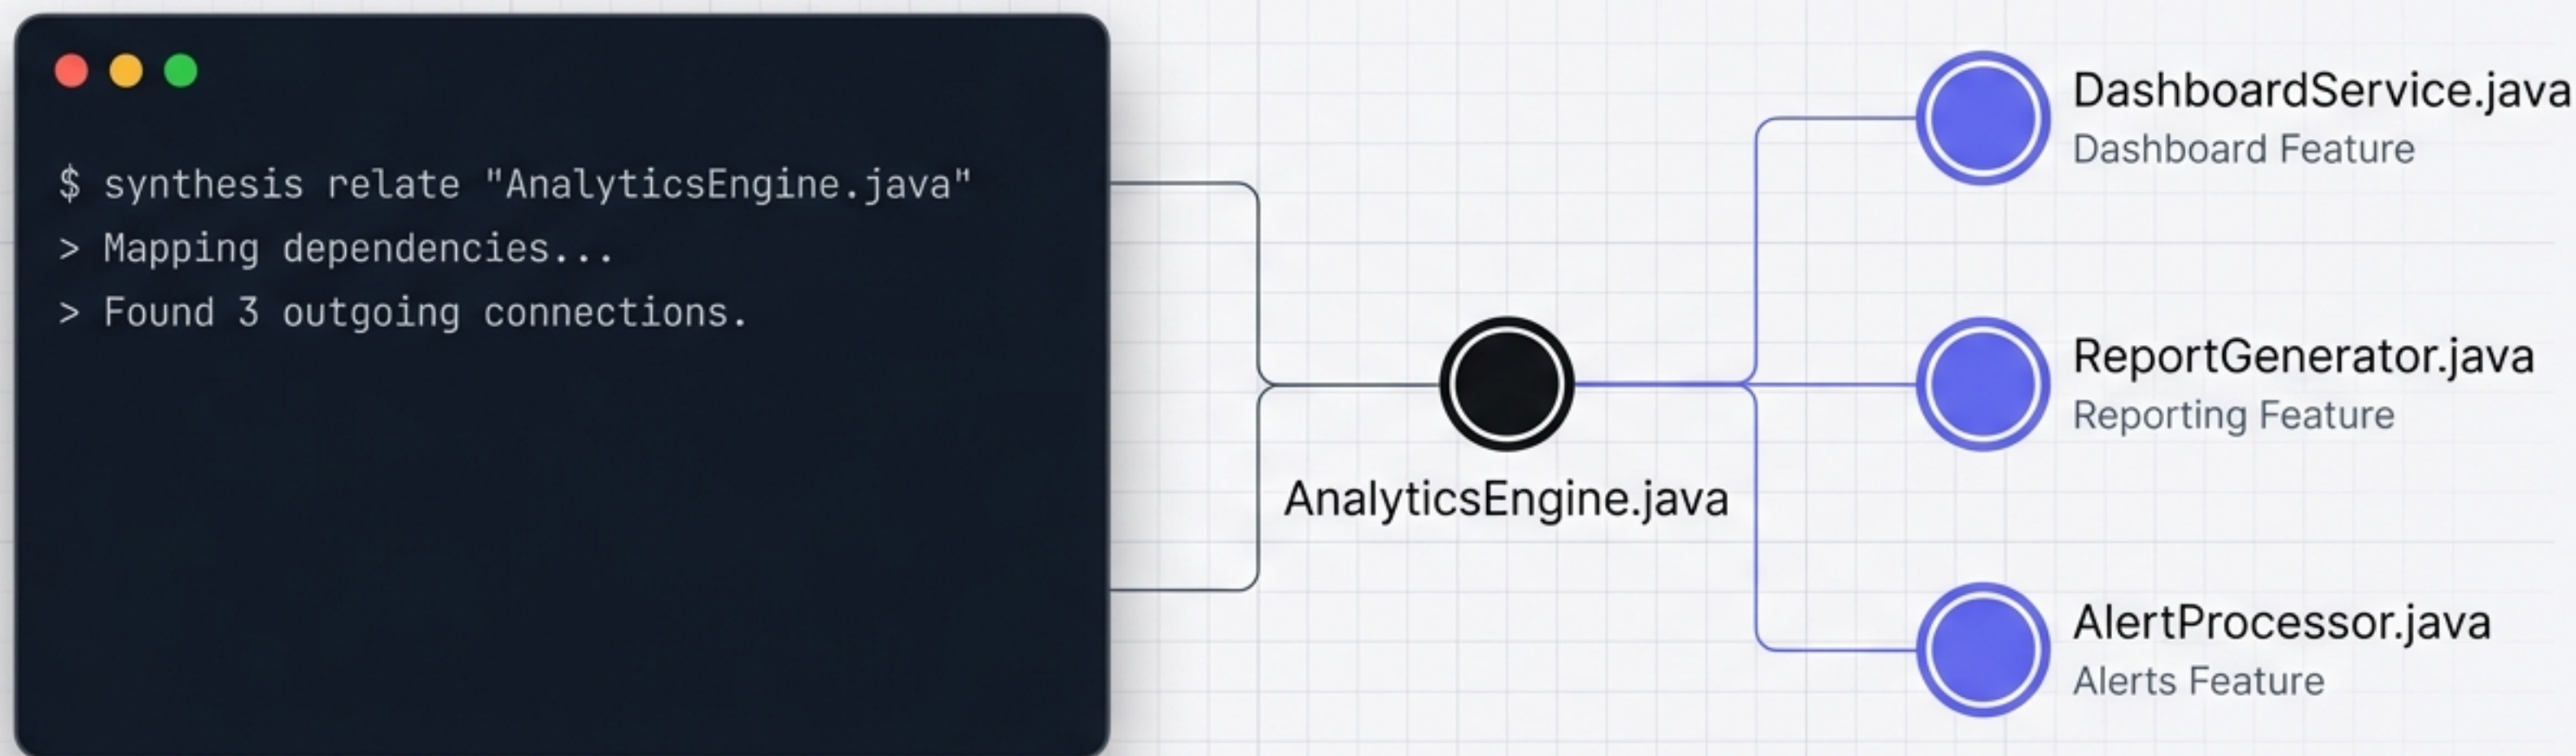

```
> synthesis search "real-time analytics"  
• real-time-analytics-demo.mp4 (1080p)  
• AnalyticsEngine.java  
• performance-benchmarks.md
```

Result: Video found, Code ready, Docs open.

Turn Technical Questions into Revenue Opportunities

Customer asks: "If we buy Analytics, what else does that enable?"

Instantly identify dependent features to drive upsell.

Turn Hours of Audit Time into Minutes of Strategy

Scenario: Quarterly Business Review (QBR) Preparation

```
> synthesis search "demo"  
--created-after 2026-01-01
```

Returns 8 Videos

```
> synthesis search "case study"
```

Returns 5 PDFs

```
> synthesis graph --modules
```

5 Minutes

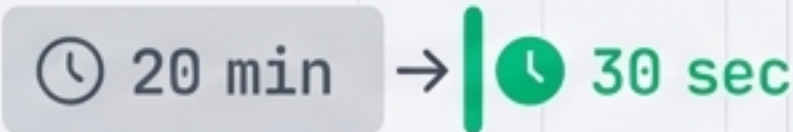

Powering Your Existing Tools

Metrics That Matter

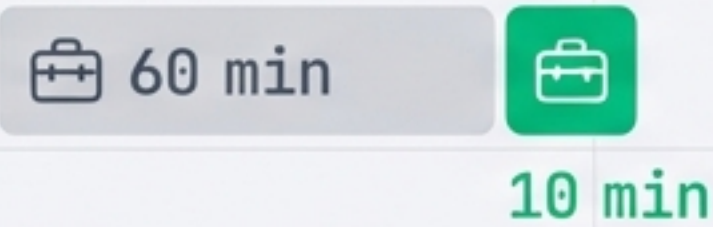

Time to find demo

20 min → 30 sec

Inter Regular

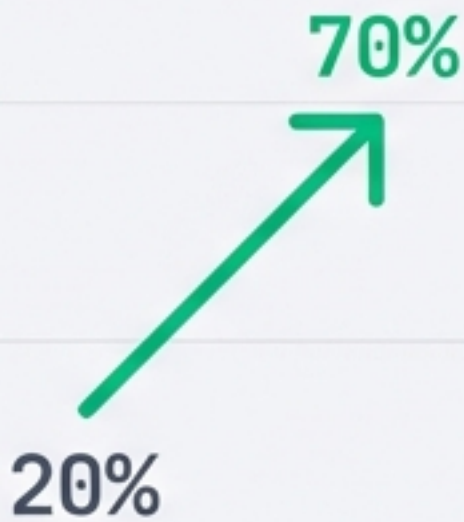

Demo Prep

60 min → 10 min

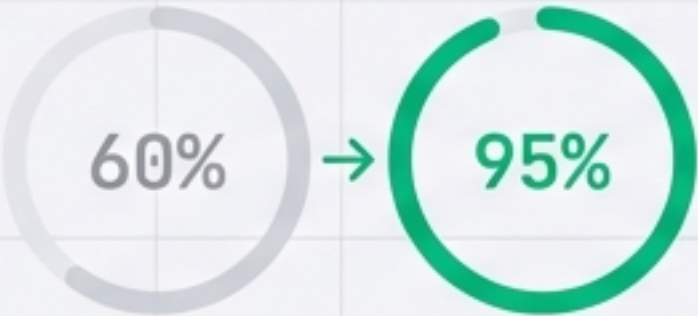

Inter Regular

Content Reuse

20% → 70%
Inter Regular
Assets discovered and used.

Content Discovery

60% → 95%
Inter Regular
Completeness.

Increasing the ROI of every asset created.

Your Next Step: Pick One Workflow

Start with one pain point. Prove the value. Expand.

01

The Video Hunter

Index Google Drive + Local Downloads.

Solve the "Where is that video?" problem.

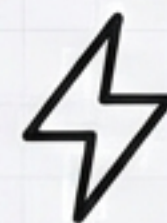

02

Sales Support

Create a Feature Inventory.
Solve the "Does anyone have a deck for this?" problem.

03

The Automator

Automate QBR Prep.

Solve the administrative burden problem.

Command Cheat Sheet

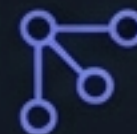

SEARCH

```
synthesis search "term"
```

Find code, docs, and media.

RELATE

```
synthesis relate "file"
```

Map feature dependencies.

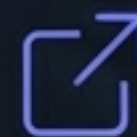

GRAPH

```
synthesis graph --modules
```

Generate visual architecture maps.

EXPORT

```
synthesis export --onboarding
```

Create instant content packages.

One index. Infinite answers.
